

The logo for Clever Bending, featuring the word "CLEVER" in a stylized, outlined font. The letter "E" is unique, with a red arrow-like shape pointing to the left from its top bar.

BELTED PRESS BRAKE REINVENTION

Revolutionary Clever E-Press Brake re-invents belt-pulley tech.

Driving both Y axis like hydro or ball 21 screw machine.

No lack of power distribution like current belt-pulley design.

Patented lever with compact internal springs to lift beam allowing groundbreaking C-Frame design with minimal deflection.

No other concept can beat this stability.

Clever is modular, light and extremely fast with lowest cost of ownership.

Fast approach of 280mm/sec challenging any cycle times currently available.
